Preface

Congratulations on your purchase of a Geomagic Touch haptic device! This guide will step you through the installation and of the Geomagic Touch Device Driver. Detailed instructions for installing the Geomagic® Touch haptic device can be found in the Geomagic Touch Device Guide.

Throughout the documentation the use of the term “Geomagic Touch device” refers to any of the Geomagic Touch family of haptic devices. Any exceptions are noted.

Resources for Learning Freeform or OpenHaptics Toolkit

The following documentation and materials are provided to help you learn how to use the systems:

The Claytools Installation Guide  The Claytools Install Guide is a printed and electronic document that contains instructions on installing and setting-up the Claytools system as well as troubleshooting tips.

The Freeform Installation Guide  The Freeform Install Guide is a printed and electronic document that contains instructions on installing and setting-up the Freeform Modeling system as well as troubleshooting tips.

The Freeform Tutorials  An electronic document containing several lessons that exercise the basic features of the system. If you do a typical install, this document is available from the Freeform program group. Otherwise the document can be found on the product DVD or online.

The Openhaptics Installation Guide  The Openhaptics Install Guide is a printed and electronic document that contains instructions on installing the toolkit and deploying your haptically enabled application.

The Openhaptics Programmer’s Guide  This guide explains the Openhaptics toolkit (which includes the QuickHaptics™ micro API), and introduces you to the architecture of the toolkit, how it works, what you can do with it, as well as the fundamental components of creating haptic environments.

The Geomagic Touch Device Driver Installation Guide  The Geomagic Touch Device Driver Installation Guide (this document) is an electronic document that contains instructions on installing the Geomagic Touch Device Driver as well as troubleshooting tips.
The *Geomagic Touch Device Guide* is an electronic document (located on the Freeform product DVD or online) that is shipped with your haptic device that describes the process of installing the device drivers and connecting the haptic device as well as how to work with the device including proper handling, troubleshooting, and device specifications.

**Product DVD** Users may also find helpful files located on the product DVD.

**WebSite** A variety of information is available via the website at http://www.geomagic.com, including updated information, answers to Frequently Asked Questions, expert “tips and tricks,” example models, and more.

Chapter 1

Getting Started

This guide covers the currently shipping Geomagic Touch Device Driver. The information contained in this manual was current at the time of publication. Visit www.geomagic.com for the latest information.

This chapter describes the following:

• The contents of the shipping box
• System Requirements
• An overview of the installation process

Contents of the Shipping Box

If you are purchasing a Geomagic Touch haptic device for the first time, in your shipping box you should find the following:

• **The Geomagic Touch Device Guide**: The Geomagic Touch device uses high-fidelity force feedback to make it possible to touch and manipulate virtual objects. This can be found in electronic form on the Freeform product DVD and online.

• **The Geomagic Touch Device Driver Installation Guide**: Describes the process of installing the device drivers and connecting the haptic device as well as how to work with the device including proper handling, troubleshooting, and device specifications. This can be found in electronic form on the Freeform product DVD and online.

• **The Claytools, Freeform or Openhaptics Kit**: This kit contains a DVD and the Installation Guides.

• **RJ45 Ethernet Cable**: This cable is used to attach the computer’s Ethernet port to the device or, one unit to another.

• **Universal Power Supply**: The power supply can be used on any standard circuit, using the supplied power cord.

• **Power Cord**: The power cord connects the Universal Power Supply to the wall outlet.

If any items are missing, please call Customer Support at 1-888-736-7225.
System Requirements

This section describes the hardware and software requirements for running one of the applications. Check the support section of the website for the latest system requirements information and specific qualified system configurations.

Some users have had success running system configurations that deviate from the following. In such cases, these configurations are not officially supported by Geomagic, Inc.

Additionally, a variety of hardware platforms are tested in combination with the graphics subsystems. While we make every attempt to be as thorough as possible, hardware manufacturers change their products frequently and may be shipping newer products or have discontinued active support for others. Check the support section of the website for the latest system requirement information and specific qualified systems.

32-Bit Operating Systems

The 32-bit editions of software are designed to run on the Microsoft® Windows® XP Professional (32 bit edition) or Windows® 7 (32 bit edition). Running the system requires the following:

- 512 MB of free hard disk space for OpenHaptics, 4GB for Freeform.
- 1280 x 960 or higher display resolution
- Geomagic Touch X, with one of the following:
  - Supplied USB > Ethernet adapter
  - Onboard 10/100 Mbps compatible Ethernet port

Additionally, your machine must meet either the recommended or minimum requirements:

Recommended:

- Dual Xeon® Pentium® IV 2.4 GHz or better processor
- 2 GB RAM
- Windows® XP Professional SP3 or Windows® 7

64-bit Operating Systems

The 64-bit editions of the software are designed to run on the Microsoft® Windows® XP (64 bit edition), Windows® 7 (64 bit edition), or Windows 8 (64 bit edition). Running the system requires the following:

- 512 MB of free hard disk space for OpenHaptics, 4GB for Freeform.
- 1280 x 960 or higher display resolution
- Geomagic Touch X, with one of the following:
  - Supplied USB > Ethernet adapter
  - Onboard 10/100 Mbps compatible Ethernet port
Chapter 2
Installing the Geomagic Touch Device Driver

This chapter will step you through the Geomagic Touch Device Driver installation process, help you verify that your system is set up properly, and describe how to properly handle the Geomagic Touch haptic device. The instructions are for both existing and new users except as noted.

The DVD contains two types of software:

• The Claytools, Freeform or OpenHaptics Toolkit application
• The Geomagic Touch Device Drivers

Note that, as with most other software packages, you must have administrator privileges on the machine in order to install. If you are unfamiliar with installing software or do not have administrator privileges, please see your System Administrator for more information.

Uninstalling Previous Versions of the Device Driver

Before installing the new Geomagic Touch Device Driver, you MUST first uninstall any previous versions of the Phantom Device Driver (PDD) that you have installed on your system.

1. From the Control Panel, click Programs and Features.
2. Locate and select PHANToM Device Drivers.
3. Click Uninstall and follow the instructions.
2. Installing the Geomagic Touch Device Driver

Installing the Geomagic Touch Device Driver

1. If you have a previous version of the (Phantom) device driver on your system, you **MUST** manually uninstall the previous version of the device driver before starting the installation process. See Uninstalling Previous Versions of the Device Driver.

2. Insert the product DVD into your DVD drive or download the Geomagic Touch Device Driver from http://sensable.com/support-downloads.htm. The Installation Wizard starts automatically.

   Note: If the installation wizard does not start, you will need to manually start the installation. Using Windows Explorer, browse the **DVD** and locate and double-click the **Install Wizard.exe** file.

3. Follow the Install Wizard to start the installation of the Geomagic Touch Device Driver.

4. In the **Choose Components** dialog, be sure the check box, "Desktop Shortcuts" is selected. This will create desktop shortcuts for the **Geomagic Touch Setup** and **Geomagic Touch Diagnostic**. If you do not install the Desktop Shortcuts, you will need to go to **Start>Programs>Geomagic Touch** to run the Geomagic Touch Setup and Geomagic Touch Diagnostic.

   ![FIGURE 1.](image)

You are now ready to setup your device.
Setting Up the Geomagic Touch Device

Double-click the Geomagic Touch Setup icon on your desktop. You will be presented with a dialog box for setting up your device. Make sure that the correct Geomagic Touch model is chosen.

Note  If you have not installed Desktop Shortcuts, go to Start>Programs>Geomagic Touch to run the Geomagic Touch Setup.

Connecting the Geomagic Touch Device

Plug the Geomagic Touch device into a power source and into your PC as described in the Geomagic Touch Device Guide.

Warning  To lift the Geomagic Touch X, grab the metal covers and support the base when moving it. To lift the Geomagic Touch, grasp both sides of the base. Lifting a Geomagic Touch device by any of its moving parts may break the device. DO NOT lift by the stylus.
2. INSTALLING THE GEOMAGIC TOUCH DEVICE DRIVER

Connecting the Geomagic Touch Device
Appendix A: Customer Support

If you encounter any difficulties within your warranty period, you can obtain Technical Support through the three channels listed below. If you are out of warranty and do not have active maintenance, Technical Support is limited.

- If you purchased your software/device from a distributor, please contact them first.
- Customer Support can be reached via e-mail at SensableSupport@geomagic.com.
- Customer Support can also be reached via telephone:
  - In the United States: 1-888-736-7225
  - Outside the United States: +1-781-939-7444
